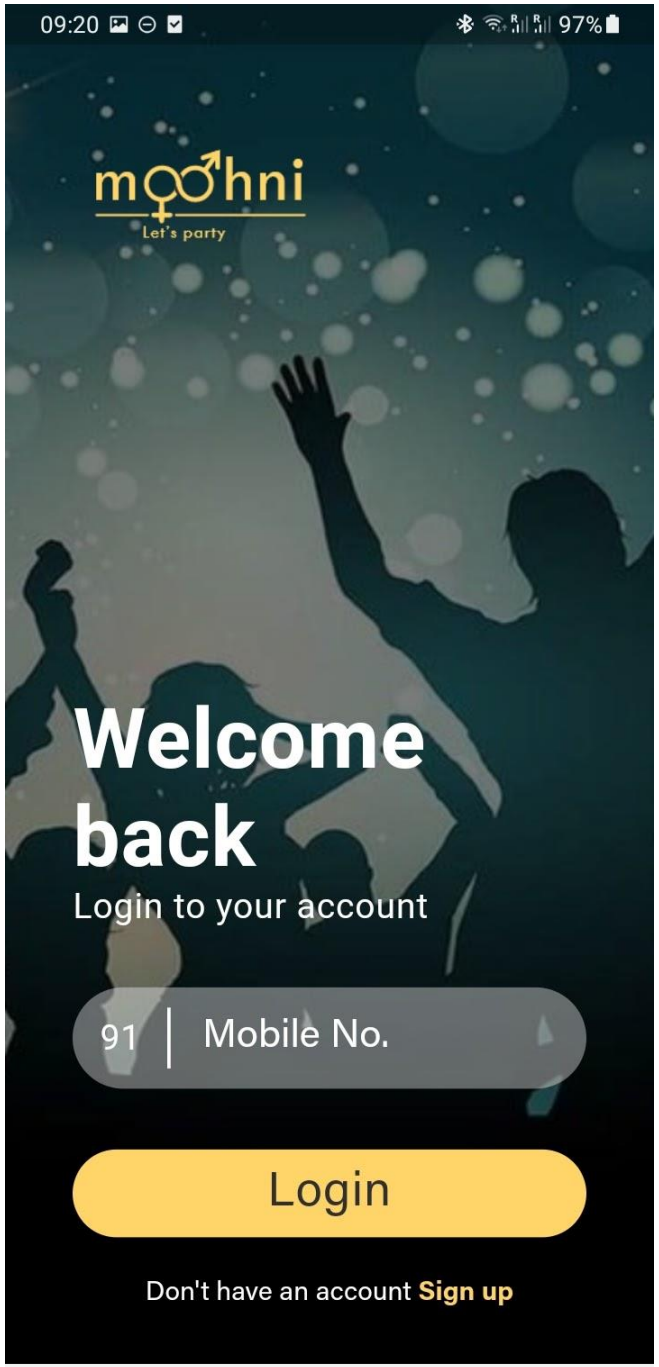
Corrections of moohni:

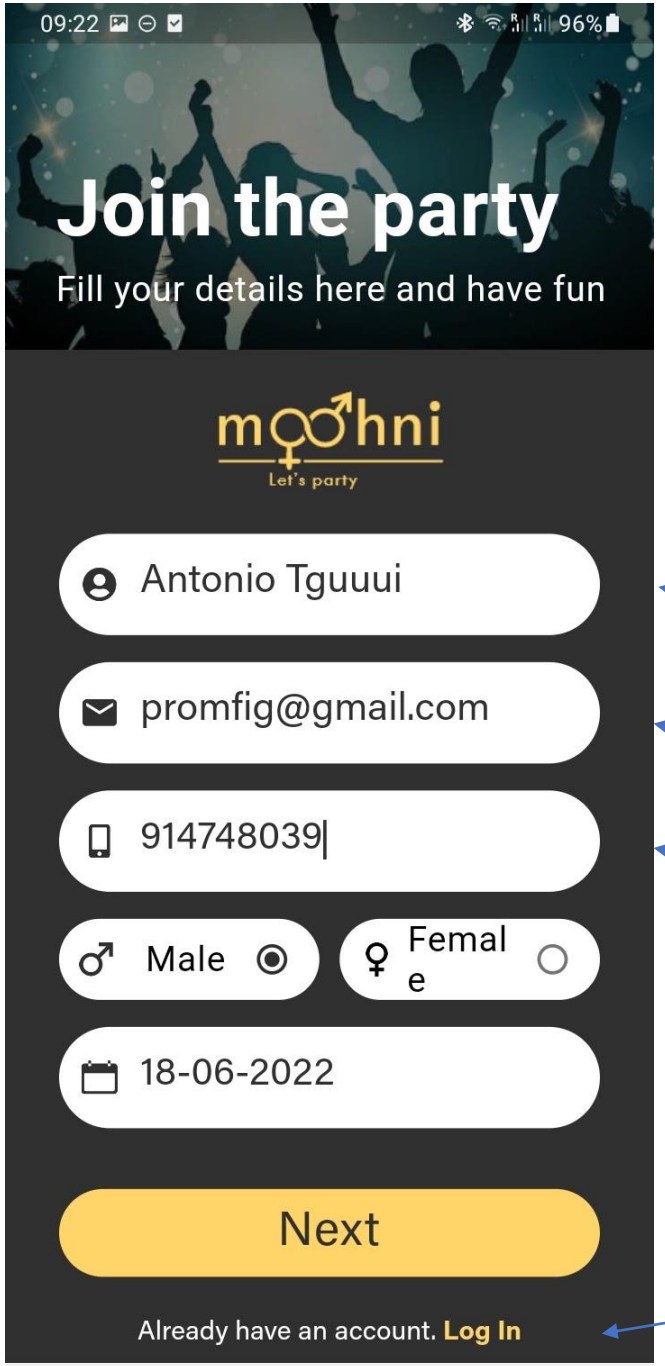
1. Login
2. Add Profile
3. Profile screen
4. Add moohni
5. My Moohnies screen

11:02
moohni
Let's Party



Login screen

1. No need “Sign Up”
2. The process should be the same as Flylinc

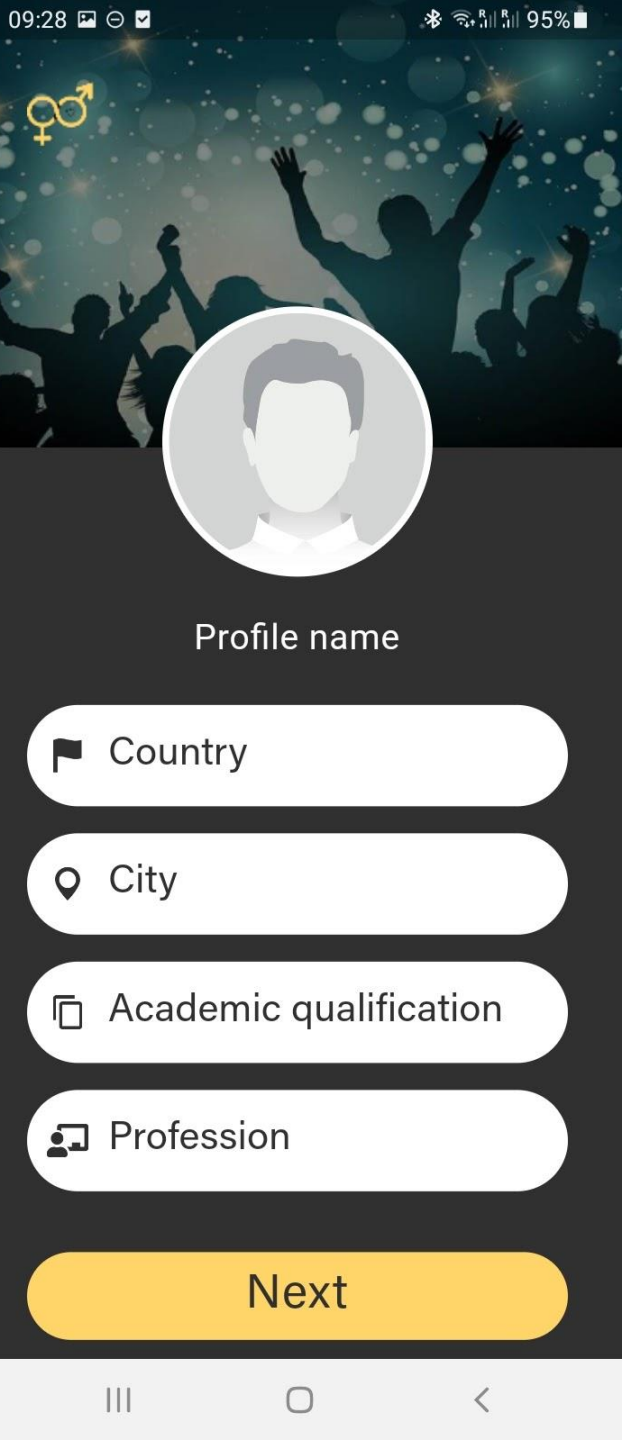


Add profile screen
Save in table_login

Adjust the font size in all boxes for the text fill in one line

1. Name (blocked after saved)
2. Mail (this field he can edit)
3. Tls (blocked after saved)
4. Idsex (blocked after saved)
5. Borndate (blocked after saved)

No need “”Already have….”
The process should be the same as Flylinc

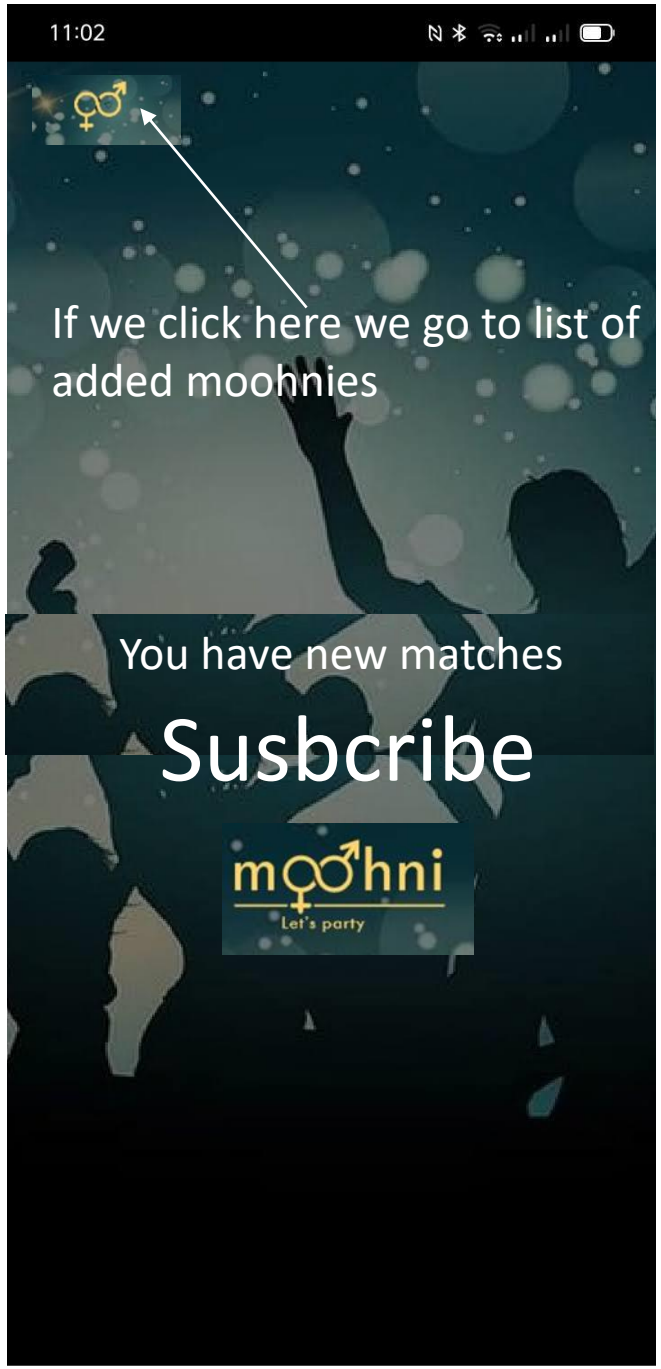


Save in table_login

Reduce the font size in all boxes for the text fill in one line

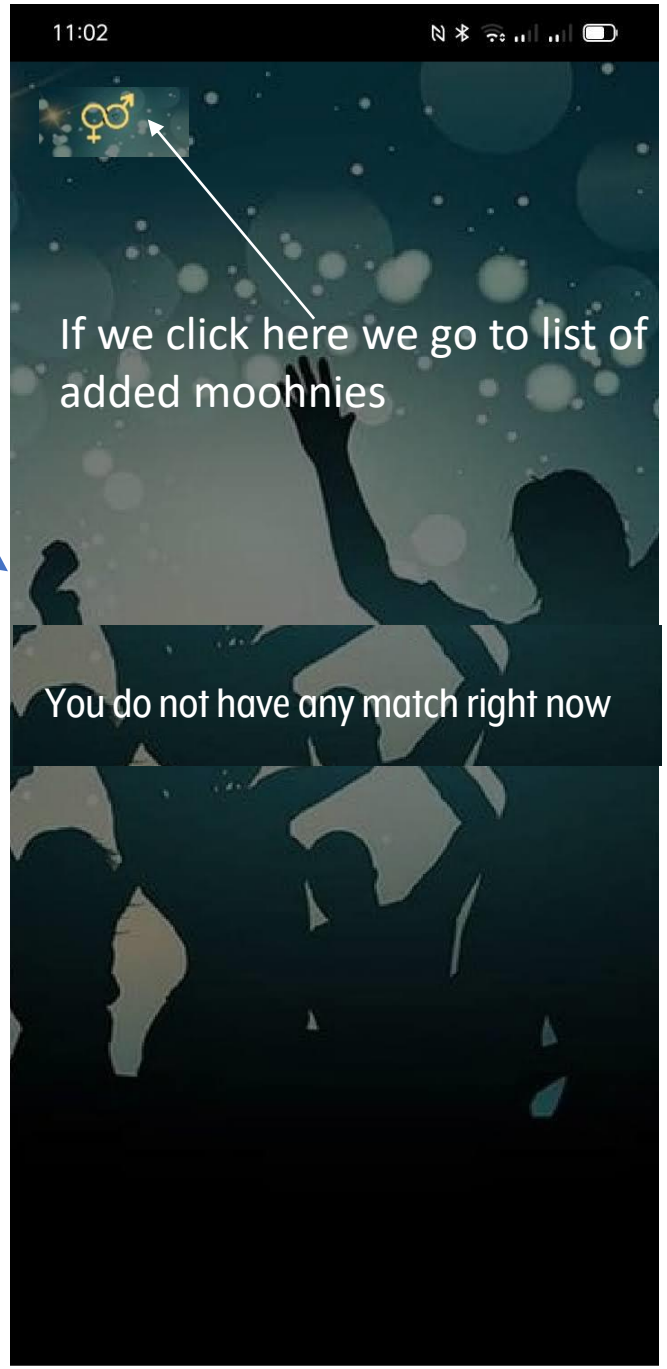
1. table_country **save** in idcountry (this field he can edit)
2. table_city (depends on idcountry) **save** in idcity (this field he can edit)
3. table_qualifications **save** in idqualifications (this field he can edit)
4. table_profession **save** in idprofession (this field he can edit)

1. After the user filled his profile he goes to Add moohni screen
2. But if he logout before add any moohni the first screen to appear after the user did the login is the match screen or one of the following slide

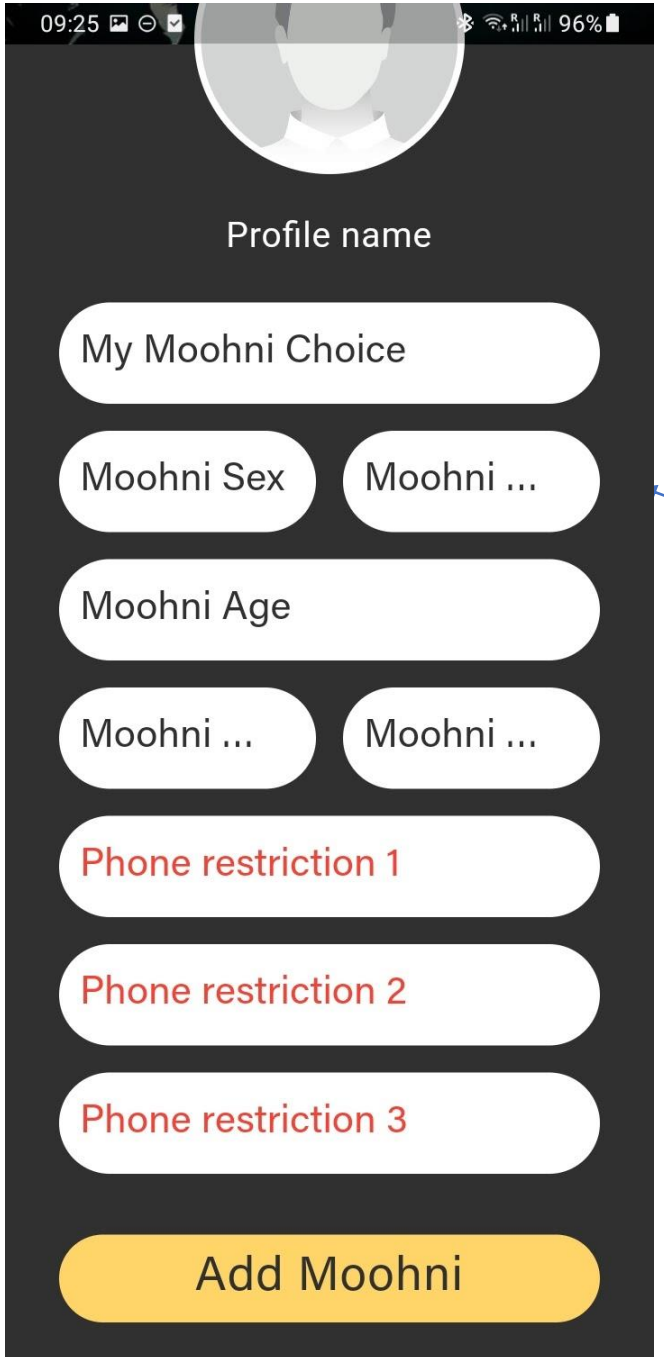


IMP: This screen appears for each moohni added when user want to see the matches

This screen appears when user want to see the matches but did not pay.

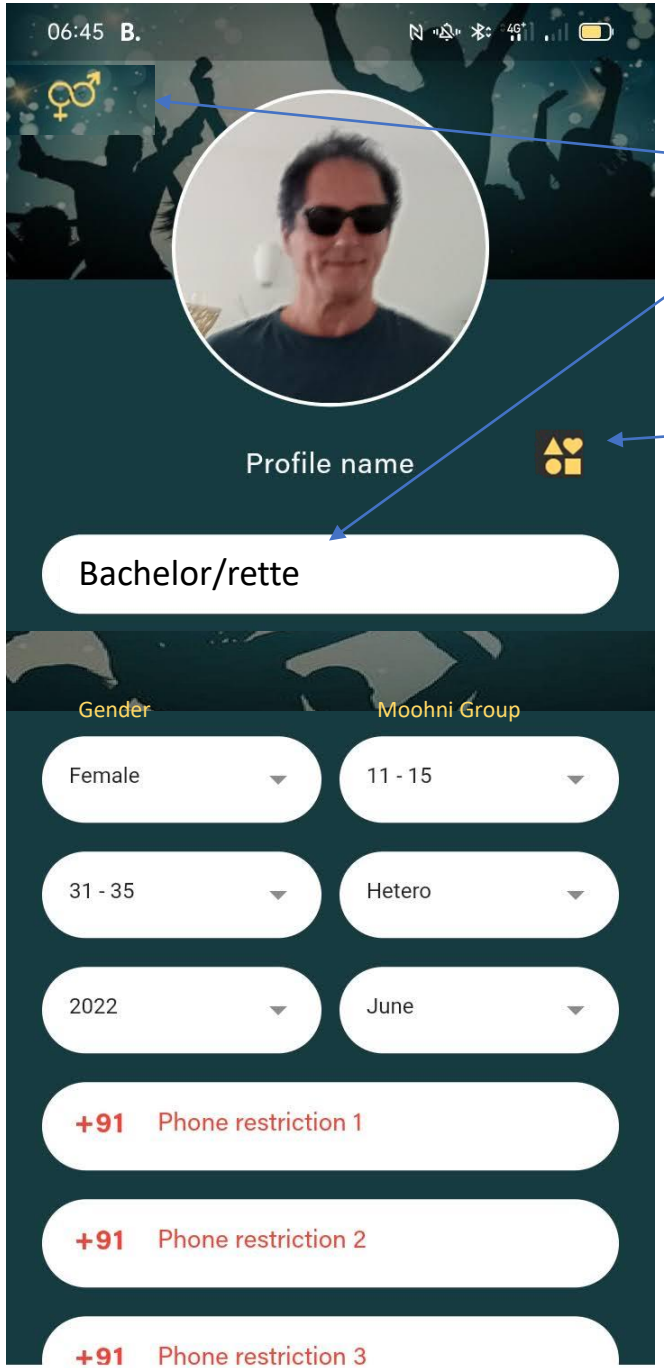


Add moohni screen



1. Adjust the font size in a way the name of the forms could be read

2. The Phone restriction needs also a country code. Do the same as it is in Login



Added moohni screen

If we click here we go to list of matches for this moohnie. Each moohni has its own matches

If we click here we go to add moohni screen

Moohnies added…

1. Show the name of each form
2. Swipe left, right to see other moohnies added
3. Touching in any form it goes to list of matches for this moohni. Each Moohni has its own matches
